

Ruby on Rails Developer

Aleksandr Kuznetsov

✉ statfluct@yahoo.com

🌐 LinkedIn: @alejaldo

🐙 GitHub: Alejaldo

📅 Date of birth:

29.01.1992

Professional Summary: Experienced Ruby on Rails developer with 5 years of professional experience in building scalable web applications and APIs. Strong background in business development and financial management, bringing unique perspective to software development. Proven track record of delivering high-quality solutions, optimizing performance, and collaborating effectively in cross-functional teams.

Key Achievements

- **Performance:** Significantly improved system performance and database query efficiency
- **Quality:** Implemented comprehensive test coverage, significantly reducing production bugs
- **APIs:** Built 20+ RESTful endpoints with high availability
- **Refactoring:** Refactored large-scale legacy codebase (measured via git diff) following SOLID principles

Technical Skills

🔥 Ruby & Rails

Expert level, 5 years experience

🗄️ Databases

PostgreSQL, SQLite, Redis

📄 Frontend

HTML, CSS, JS, Bootstrap, Webpack

🧪 Testing

RSpec, FactoryBot, Capybara

🚀 DevOps

Docker, Kubernetes, AWS, Heroku

Additional Skills

💎 Version Control

Git, GitHub

🔗 APIs & Integration

RESTful APIs, WebSocket, Kafka

🔍 Monitoring

Logz.io, New Relic, Helios

🌐 Web Scraping

Nokogiri, OpenURI

Languages

Russian (Native), English (Upper-Intermediate), Spanish (Elementary)

Professional Experience

Sep 2023 – Present

Ruby on Rails Developer

[IT_ONE company](#)

- Created and optimized RESTful APIs in Ruby on Rails, significantly improving system performance and enhancing user experience
- Maintained and refactored legacy Ruby on Rails codebase, reducing technical debt and improving code maintainability
- Optimized database interactions and resolved complex bugs related to scopes and queries, significantly improving query performance
- Developed innovative solutions for data retrieval across associated Rails applications using ActiveRecord
- Implemented advanced data logic for seamless integration with external Rails applications, ensuring data consistency
- Implemented comprehensive test coverage with RSpec, significantly reducing production bugs and improving code reliability

Oct 2021 – Aug 2023

Ruby on Rails Developer

[Selina](#)

- **API Development and Integration:**
 - Collaborated with a 15+ member cross-functional team to design and develop API functionalities, facilitating seamless integration of payments, bookings, and event management systems
 - Developed and maintained 20+ robust API endpoints supporting internal and external services, ensuring high availability and reliability
 - Led integration of external services using RESTful APIs and Kafka message brokers, significantly improving data processing efficiency
 - Implemented security best practices for data handling and authentication, significantly improving system security
- **Maintenance and Codebase Improvement:**
 - Refactored legacy codebase containing 50,000+ lines of code, significantly improving maintainability and code quality
 - Extracted complex business logic into service objects, following SOLID principles and improving code testability
 - Implemented comprehensive RSpec test coverage, significantly improving code reliability and reducing production issues
 - Designed and implemented new models and controllers supporting 5+ new business features

Aug 2020 – Sep 2021

Web Development

[Freelance Projects](#)

- Developed Ruby on Rails applications: Chamonix (meetings), Askme (Q&A), Kabulchat (WebSocket chat)
- Created Ruby console applications: Weather app, Hangman game, Store simulation
- Built frontend projects: Landing pages, video search forms
- Implemented web scraping solutions using Nokogiri and OpenURI

Apr 2017 – Sep 2021

Business Development

[Various Companies](#)

- Product management & marketing: organized first Russian PCB for oil drill electronics, \$1.3M sales
- Financial modeling and forecasting: raised \$260,000 in grants

Education

2009 – 2014

South Ural State University

Specialist/Master's Degree – Financial Management

2021

Good Programmer

Ruby on Rails Developer
